Will expanding South Korea's solar PV industry help secure global competitiveness?

South Korea's PV industry in various value chain sectors. Notwithstanding high levels of technological expertise, the polysilicon and wafer sectors in South Korea's domestic PV industry have collapsed. Some hope that expanding South Korea's solar PV market will help secure global competitiveness for domestic cell and module manufacturers, but

Why is iRex important for solarbk?

Therefore, showing the world the Vietnamese brand (IREX) is always SolarBK's priority. Without great determination, there comes a higher chance that Vietnamese companies will struggle to compete in their own home, especially in the context of "flat" market now. To prepare for this, IREX has built a special competitive strategy.

That would certainly be practically quadruple the total amount of 1.1 gigawatts of solar power from factory areas around the country currently, according to the statement. South Korea lacks the available land to develop massive solar farms. The project aims to expand capacity by using idled space in massive industrial complexes.

South Korea aims to have 30 nuclear plants by 2038 and to more than triple its solar and wind power output to
