

Is it cost-effective to install solar panels to generate electricity

Why should you install solar panels?

Installing solar panels lets you use free, renewable, low carbon electricity. You can sell surplus electricity to the grid or store it for later use. According to low-carbon certification organisation MCS, there were more than 183,000 solar panel installations across the UK in 2023.

How much does a solar panel system cost?

Solar electricity is low carbon, renewable energy. A typical home solar panel system could save around one tonne of carbon per year, depending on where you live in the UK. That's the equivalent of driving 3,600 miles, or from London to Bristol 30 times. The average domestic solar panel system is 3.5kWp and costs around £7,000.

Why do solar panels cost so much?

Solar panel quality significantly impacts their cost. Higher-quality panels, made with superior materials and advanced technology, offer greater efficiency, longer lifespans, and better warranties. This higher upfront cost is justified by increased energy production and durability, leading to greater long-term savings and reliability.

Are solar panels a good investment?

Buying solar panels is a long-term investment that should help cut your electricity bills and carbon footprint. But will they pay for themselves and earn you money? Solar panels are often marketed as a way to save money on electricity - and sometimes as a way to make money too.

Is it worth getting solar panels in the UK?

It's definitely worth getting solar panels in the UK. The UK isn't especially sunny, but it receives more than enough daylight to save households hundreds of pounds per year on their electricity bills - and what you don't use, you can sell to the grid.

What are solar panels & how do they work?

Solar panels, or photovoltaics (PVs), harness sunlight to produce electricity for your home. Generating electricity this way is an effective way of cutting your energy bill and your carbon footprint as the energy produced is 100% renewable.

The cost of installing panels in the UK can vary. It's determined on the size of the solar panel system you need. For a typical 3.5 kW solar panel system, which is usually 10 panels, you can ...
