

# Is the solar powered phone holder any good

Do you need a solar phone charger?

You might find yourself relieved to have a solar phone charger on hand, which not only tends to be lightweight and easy to carry around, but these gadgets effectively leverage the sun's power to power up your devices.

Should you use a portable solar panel Charger?

Typically, portable solar panel chargers are meant to function as a source of backup power, not as the primary way to charge your phone every day because of their slow charging speed. The quality and efficiency of solar-powered phone chargers are getting better all the time.

Which solar charging case is best?

Tough, waterproof, usable with most phones, and with some handy extras, the Blavor phone case is an excellent choice for keeping your phone protected and charged. Another solar charging case with Qi wireless technology, the 2BConnect Solar Charger Power Bank can charge any Qi-compatible device.

How much power does a solar phone charger use?

A charger between 10 and 15 wattsof power is usually sufficient for charging one or maybe two phones. The wattage of a charger is the amount of solar electricity it can produce, so larger panels usually mean more wattage. There are two main types of solar phone chargers to keep an eye out for:

Can a solar phone charger be used on a backpack?

Many solar phone chargers can hang off of a backpack on the trail or sit on the dashboard of a car and fold up, making them perfect for on-the-go power. Device compatibility is less of an issue, but you'll want to watch out for it just in case.

What is the best solar phone case?

The Blavor Qi-enabled power bank is the best solar phone case on our list. It is compatible with the iPhone XR/XR MAX/XS/X/8/8plus, Samsung Galaxy S9/S9 Plus S8/S8 Plus, and all Qi-enabled mobile devices, giving it great utility. Being Qi-enabled means that the power bank can charge any phone with a wireless charging option.
