Are there plans to build a solar farm in Jersey?

Concerns have been raised over plans to build six solar farms across Jersey. The first site is nearing completion at St Clement and two other sites have passed the planning stage, with building work expected to begin in early 2025.

What do people in Jersey think about solar farms?

Jersey Electricity (JE) is asking people in St Mary what they think about proposals for two solar farms. The solar farms would produce enough energy to power nearly 1,200 homes in Jersey, said JE. Land earmarked for the siting of the panels would continue to be used for grazing and growing crops, it said.

Does Jersey have solar panels?

JE currently has two other sites in Jersey earmarked for ground-mounted solar energy production and is also working on installing more roof-based solar panels across the island. Earlier this week, JE increased islanders' electricity tariff by 7.5% from January 2025, adding around £2 extra per week to the average household bill.

Will the price of solar energy come down in Jersey?

The JE boss says that if similar developments are built in other parts of the island, then the price of electricity produced by solar panels is more likely to come down. JE currently has two other sites in Jersey earmarked for ground-mounted solar energy production and is also working on installing more roof-based solar panels across the island.

Will a ground-mount solar panel installation reduce energy prices in Jersey?

Jersey predominantly relies on energy imported from neighbouring France. Credit: ITV Channel Jersey Electricity's (JE) CEO says a ground-mount solar panel installation on the island will help reduce energy prices in the long term.

Will Jersey be able to produce solar energy in the winter?

Mr Ambler added that while Jersey sees enough sunshine in the summer to produce solar energy, the island will still need to be connected to the wider grid in the winter when daylight hours are significantly reduced.
