What is KZ4AT traction system?

The cutting-edge traction system of KZ4AT is based on Alstom's technology and components. This locomotive requires minimum maintenance, providing low lifecycle cost and high levels of reliability thanks to its modular design. EKZ is a major production site that keeps evolving.

Why is Kazakhstan important?

Kazakhstan is an important hub linking Europe, the Middle East, Asia and Russia through the new Silk Way. With around 21,000 km of track, the Kazakh railway network is the world's third biggest network using the 1,520 mm track gauge and represents a substantial market for maintenance activities.
