

Is energy a key enabler of Kenya's long-term development agenda?

Energy is one of the key enablers of Kenya's long term development agenda the Vision 2030 which aims to ensure Kenya becomes a 'newly-industrializing, middle-income economy, providing a high quality of life to all its citizens in a clean and secure environment'. Congratulations! [pic.twitter.com/2IAKtAlmDI](https://pic.twitter.com/2IAKtAlmDI)

Should Kenya move away from bioenergy?

In the AC, Kenya could supply an economy six-and half times larger than today using little more than twice its current energy consumption, if it were to move away from bioenergy and improve energy efficiency. Two-thirds of Kenya's energy currently comes from bioenergy.

What percentage of Kenya's energy comes from bioenergy?

Two-thirds of Kenya's energy currently comes from bioenergy. This share shrinks to 15% by 2040 in the AC thanks to increased use of geothermal resources and oil. IEA. Licence: CC BY 4.0 Kenya is one of the few countries to develop geothermal energy: by 2040, it accounts for almost 50% of Kenya's power generation in the STEPS.

How will a net-zero energy transition affect Kenya?

A slower transition presents a poor outlook for energy exports as international oil and demand falls. A net-zero target will create new economic opportunities for Kenya in global energy and technology markets. Energy independence. A carefully managed transition will secure Kenya's energy independence as domestic demand grows and imports increase.

Why has Kenya made significant progress in Deploying Renewables?

Kenya has made notable progress in deploying renewables in large part because it has successfully attracted the necessary private investment for renewables projects. Further development of these resources would help it meet demand growth. Kenya Energy Outlook - Analysis and findings.

Is Kenya a good producer of oil & gas?

Kenya is not a notable oil and gas producer today, but it takes some steps to develop its relatively modest resources. Higher economic growth underpins strong growth in fossil fuel demand in the AC. Oil demand almost triples as it expands its share of the overall energy mix.

"Eternum Energy" becomes "Solaris Offgrid" to facilitate the identification of our value proposition to organizations looking for a (field) proven expertise they could adopt to increase energy access in their region. Our flagship technology "Solaris" is now about to reach its 900th system installed in the off-grid countryside of the north of Tanzania, providing a modular ...
