

What is the Kiribati energy roadmap?

The KIER is Kiribati's comprehensive energy roadmap, which takes into account renewable energy and energy efficiency potential in all sectors from 2017 to 2025.

Does Kiribati need electricity?

As a small, remote island state, Kiribati is highly dependent on imported energy supply. Electricity is one of the government's largest expenditures. Yet the current fossil fuel-based power system is inadequate to meet future demand.

Should solar PV be deployed in Kiribati?

The findings of this roadmap show that power sector is a key area, where the ongoing efforts from the deployment of solar PV should be continued and complemented with and improvement of efficiency in Kiribati's entire energy system, including electricity use, heating, cooling, and transport.

Halo Energy is using its proprietary shroud technology to build the world's most efficient small-scale wind turbines. Small wind struggles as a viable energy category because most small-scale wind turbines are inefficient compared to ...

For the outer islands over the period 1990-2004 Kiribati Solar Energy Company (KSEC) installed a total of about 285.5 kW solar PV systems with 6.4 kW for communication, 7.5 kW for street lights, 47.6 kW for community buildings and 224 kW for residential households. By the end of 2005 with the completion of the European Union (EU) outer islands ...
