

What is Kosovo's solar energy project?

The project is the largest solar energy investment in the district heating sector in the region and one of the largest solar power plants in Europe. As such, the project marks an historic moment on Kosovo's path towards a decarbonised energy system in line with the Paris Climate Agreement.

Will Kosovo become the first economy to use solar power?

Kosovo will become the first economy in the Western Balkans region to use solar power to heat homes. The Ministry of Finance, Labour and Transfers signed a financing agreement on the Solar4Kosovo district heating project on behalf of Kosovo in Pristina today.

How will the EU support the energy transition in Kosovo?

The EU will support the energy transition and sustainable development of Kosovo through another 100-megawatt solar electricity project with the Kosovo Energy Cooperation." The EU's contribution to solar heating and electricity projects in Kosovo will total almost EUR56 million.

Will Kosovo use solar energy for district heating?

In late December 2022, Kosovo became the first country in the Western Balkans Economy to use solar energy for district heating. Kosovo's Minister of Finance, Labour and Transfers, Hekuran Murati, said the project would ensure access to the central heating system for about 38,000 citizens.

How much will Germany contribute to Kosovo's solar energy project?

The EU's contribution to solar heating and electricity projects in Kosovo will total almost EUR56 million. "Germany has supported Kosovo in its transition from coal to sustainable energy and decarbonisation in accordance with the objectives of the Green Agenda for the Western Balkans," said Germany's Deputy Ambassador to Kosovo Matthias Conrad.

This is the first large-scale photovoltaic system in Kosovo that can increase the installed capacity of photovoltaic energy from the current 10.1 MW (2022) to up to 110.1 MW. The project contributes to the achievement of these following ...

Kosovo has prioritized the development of solar and wind resources under the Energy Strategy 2022-2031, with the construction of a 100 MW solar PV plant being devised among numerous priorities foreseen in the Energy Strategy, ...

But the energy mix - the balance of sources of energy in the supply - is becoming increasingly important as

countries try to shift away from fossil fuels towards low-carbon sources of energy (nuclear or renewables including hydropower, solar and wind).

Viti i kaluar ka shënuar një rritje të madhe të numrit të kërkesat për instalimin e paneleve solare në shtet. Rritja e vetdijësimit ndaj ndikimeve mjedisore, nevojë për përmisim të efikasitetit dhe ndërrprerjet e energjisë të shkaktuar nga mungesa e furnizimit gjatë vitit 2021 dhe 2022 kanë treguar një rritje të dukshme të instalimit të sistemeve solare në shtet; Kosovë.

The district heating project envisages the construction of a solar power plant that uses the sun's energy for central heating. It will also increase heating capacity by expanding the network by 50 MW. The ...

Kosovo\* solar potential is in the middle-range compared to the global potential. The average daily yield potential of 1 kW of installed solar PV capacity in Kosovo\* is around 3.7 kWh/kWp or 1,350 kWh/kWp in a year, said Haxhiu, adding that this is a good energy yield which enables investment return within a reasonable timeframe.
