

Who is Leclanche?

Leclanche SA is a world leading provider of high-quality energy storage solutions based on lithium-ion cell technology. We are committed to accelerating our progress towards a cleaner energy future. We have over 100 years of battery and energy storage innovation, powered by German engineering and Swiss quality.

Is Leclanche a publicly traded company?

Leclanche is the only publicly traded, pure play energy storage company in the world, and is listed on the Swiss Stock Exchange. Discover a selection of our customers and projects in Stationary Solutions, eTransport Solutions and Specialty Battery System. Our core technology expertise ranges from electrochemistry to energy management software.

What is Leclanche's E-transport solutions?

Leclanche's e-Transport Solutions team powers the electrification of transport (trains, vessels, trucks and more) through efficient, proven and reliable energy storage solutions. This group creates custom low-voltage battery systems for a wide range of demanding applications.

What's new at Leclanche?

Leclanche is reorganizing itself to become a green tech software and systems integration company with expanded production and R&D capabilities. Our core operating units consist of Stationary Solutions, e-Transport Solutions and Special Battery Systems while an independent,

How safe is Leclanche?

At Leclanche, there's no compromise on safety for our employees and the solutions we design. Leclanche has developed multi-level safety measures on a cell, module and system level - all tested and certified against mechanical, thermal and electrical abuse.

A 5.2MW / 2.9MWh energy storage system will be installed in the internal medium voltage grid of the natural gas plant, which is owned by French transnational utility company Veolia. Owing to changing European regulations for secondary reserve frequency control of the grid, the plant will be required to halve the time it takes to reach full ...

Sonnen is a market leader for residential energy storage and it's installed about 11,000 systems globally and most of those are in Germany," Allman said. "This kind of scheme blows that out of the water in some respects in terms of the volumes we're talking about. So to put it in to context, having a large volume scheme like ...

The company's energy storage solutions, which use cranes to lift huge weights on towers, lowering and

swinging them to release energy for durations from two to 12 hours, could be deployed and implemented at BHP ...

We offer environmentally and economically sustainable solutions for power generation in remote regions and islands where our Electrical Energy Storage Systems (EESS) reduces dependence on fossil fuel, maximizes the use of ...

Leclanche SA is a world leading provider of high-quality energy storage solutions based on lithium-ion cell technology. We are committed to accelerating our progress towards a cleaner energy future. We have over 100 years of battery and energy storage innovation, powered by German engineering and Swiss quality.

The hybrid system combines 8.8MW / 7.12MWh of lithium-ion batteries with six flywheels adding up to 3MW of power. It will provide 9MW of frequency stabilising primary control power to the transmission grid operated by TenneT and is located in Almelo, a city in the Overijssel province in the east Netherlands.

As reported by Energy-Storage.news earlier this month, the president attended a ceremonial switch-on event for a grid-scale battery storage installation as it came online for power company SMC Global Power.. SMC Global Power is building 1,000MW/1,000MWh of battery energy storage system (BESS) assets, deploying them at the sites of existing thermal ...

Switzerland-headquartered energy storage solutions provider Leclanche; previously announced the project on the island of St Kitts. The project, called Green Power Plant, integrates 35.7MW of solar PV with 45MWh of ...

How does it work? Microgrids require a smart, flexible Energy Management System (EMS) which integrates battery storage solutions and multiple renewable energy sources such as wind and solar with conventional generation, while at the same time preserving grid stability. A Leclanche; turnkey Electrical Energy Storage System (EESS) is ideally suited for different scales of ...

Two major players in the renewable energy sector, Honeywell and Leclanche;, are set to elevate the sustainability quotient of the Caribbean islands. In a groundbreaking move, grid-scale battery storage will be ...

"With our latest financing in place, our Stationary Solutions business unit is primed to move forward on several projects as well as a significant product launch slated for later this year," CEO Anil Srivastava told Energy-Storage.news.. The funding will allow the battery storage provider to fulfil its order book for 2021 as well as push ahead with that new product ...

Leclanche; was also revealed by developer Hive Energy to be working to help progress plans for a 350MW / 700MWh solar-plus-storage project which has been proposed in England, although Hive said that

while Leclanche is a "preferred partner" and has helped with community and stakeholder engagement matters including formulating fire safety ...

Switzerland-headquartered energy storage solutions provider Leclanche; previously announced the project on the island of St Kitts. The project, called Green Power Plant, integrates 35.7MW of solar PV with 45MWh of battery energy storage and will provide about a third of St Kitts' baseload energy requirements for up to 25 years.

Narada will manufacture both G-NMC and LTO at its facilities in Hangzhou, China. Image credit: Younicos. Vertically integrated energy storage solution company Leclanche; and global battery manufacturer Narada Power have agreed to a strategic partnership for the manufacturing and development of lithium-ion battery technology for the ...

In announcing the BB Green project, Leclanche; also announced that it is providing a turnkey energy storage system with 4.3MWh capacity to a Danish project to build the world's largest electric ferry, expected to be completed in 2017. The BB Green ferry, powered by LTO batteries. Image: Leclanche.

A couple of years ago, analyst Sam Wilkinson of research group I.H.S Markit said that for the fledgling energy storage industry as it was, software was the most critical non-battery component of an energy storage system and would only continue to grow in importance; a view John Jung of Greensmith appeared to share.
