

Lithuania heimdall power

What is Heimdall power?

Heimdall Power's vision is to optimize power grids globally. Since 2016 our innovative technology has optimized grid utilization with state-of-the-art software and unique hardware technology. We continue to innovate and improve, creating value for customers, shareholders and society. Have any questions? Talk with us directly using LiveChat.

How does Heimdall power use neuron sensors and software?

By collecting and analysing digital data,Heimdall Power's Neuron sensors and software help to increase power line capacity,improve planning of energy flow,make grid operations more cost-effective,reduce downtime and electricity loss,and extend the lifetime of grid infrastructure.

Will Heimdall power increase the capacity of today's GRiD?

Heimdall Power estimates that its solution can help to increase the capacity of today's grid by 30 per cent. The International Energy Agency (IEA) estimates that USD 7.2 trillion will be invested in transmission and distribution grids during the period 2012-2035. Heimdall Power's target market is all power lines above 7 kV.

What is Bayernwerk Netz Heimdall power?

Expanding Collaboration With Bayernwerk Netz Heimdall Power's vision is to optimize power grids globally. Since 2016 our innovative technology has optimized grid utilization with state-of-the-art software and unique hardware technology. We continue to innovate and improve, creating value for customers, shareholders and society.

How can Heimdall power improve the power grid?

The solution is simple to install,does not require an external power source,and can be used globally with minimal maintenance and adjustments. Heimdall Power estimates that its solution can help to increase the capacity of today's grid by 30 per cent.

What can Heimdall power do for You?

Increased insight from Heimdall Power's solutions gives the grid companies new opportunities to optimize the utilization of the power system's overall resources - the cost savings are significant, security of supply increases and we can more quickly connect new renewable power generation and new green industry to the power grid.

At Heimdall Power we have one thought in mind: helping utilities run their power grids as effective, safe and cost-efficient as possible. Through our software and physical sensors (Neurons), we provide our customers with world-leading solutions for Ambient Adjusted Rating (AAR), Dynamic Line Rating (DLR) and asset health monitoring, enabling increased power grid utilization ...

Lithuania heimdall power

Heimdall Power's vision is to optimize power grids globally. Since 2016 our innovative technology has optimized grid utilization with state-of-the-art software and unique hardware technology.
