Ideally tilt fixed solar panels 16°; South in San Ignacio, Belize. To maximize your solar PV system's energy output in San Ignacio, Belize (Lat/Long 17.1574, -89.0685) throughout the year, you should tilt your panels at an angle of 16°; South for fixed panel installations.

Belize's solar energy is currently limited to off-grid use, primarily in remote areas by residential consumers, hotels, and resorts. Off-grid solar systems are completely self-contained and self-sufficient, providing electricity 24 hours a day. These systems have their own set of batteries to store and supply power, and they can also utilise ...

Sun's Electric, with over 18 years experience offers design, installation, monitoring, maintenance, and repair of grid tied and off grid solar electric systems by a licensed electrician. One of the only solar companies in Belize who offers quality with experience.

In Belize, more than 50% of power supply heavily depended on import of electric power from Mexico. However, there was an accident in major power-generation facilities in Mexico in 2009, which caused a temporary suspension of power supply to Belize. The Government of Belize was seeking for alternative energy sources such
