Mauritius global power group

Which energy sources are used in Mauritius?

In Mauritius,the primary energy requirements are met from a mix of imported sources (mainly petroleum products and coal) and local renewables. In 2020,76.1% of the country's electricity was generated from non-renewable sources: coal (39.5%),fuel oil and diesel (36.6%).

How does Mauritius generate energy?

Mauritius generates energy through various means including wind farms,solar energy,biomass,wave,and waste-to-energy projects. Currently,bagasse (sugarcane waste) is the leading source,contributing 13.3 percentto the renewable energy generation. Mauritius derives other renewable electricity from hydro,wind,landfill gas,and solar.

Does Mauritius use biomass as an energy source?

Mauritius: Biomass - the burning of charcoal,crop waste,and other organic matter - is not included in the country's energy production. However,it can be an important energy source in lower-income settings. Mauritius: How much of the country's energy comes from nuclear power? Nuclear energy - alongside renewables - is a low-carbon energy source.

How can Mauritius achieve a sustainable future?

With the view to drive forward the sustainability agenda, the government has the goal of increasing renewable energy contribution to the total energy in Mauritius from 13% to 60% and phasing out the use of coal by 2030. Indeed, this is a highly ambitious but not entirely unrealistic goal.

Does Mauritius use solar energy?

Mauritius has an attractive potential for solar energy,with an average annual solar radiation value of some 6 kWh/m2/day. Solar photovoltaic (PV) energyis an option due to the almost year-round intensive sunlight. To achieve the target of 60 percent renewable energy by 2030,Mauritius has commissioned six more solar farms.

Does Mauritius have a waste-to-energy project?

Mauritius produces about 500,000 tons of solid waste per year and its only landfill site is nearly full. In 2016,CEB (Mauritian utility company) issued a Request for Proposals for a 24 MW waste-to-energy project. Accordingly,
