

Who provided the power data for the solar PV project in Montserrat?

The power data was kindly provided by the Government of Montserrat. Figure 16: Placard for the 250kW solar PV project in Montserrat. Renewable Energy planning in Montserrat

How much does electricity cost in Montserrat?

Montserrat's utility rates start at \$0.53 per kilowatt-hour(kWh) for residential customers, which is above the Caribbean regional average of \$0.33/kWh. Like many island nations, Montserrat is almost entirely dependent on imported fossil fuels, leaving it vulnerable to global oil price fluctuations that directly impact the cost of electricity.

Does Montserrat need a geothermal plant?

To go beyond this, Montserrat is developing plans to ensure the electricity system can operate reliably. The target of 100% was based on information provided from the 2010 geothermal study⁴, and an Early Market Engagement exercise in 2017 to procure a 2.5-5MW geothermal plant which would satisfy 100% of the Montserrat energy requirement.

What is Montserrat energy policy 2016-2030?

(Montserrat Energy Policy 2016-2030). o In-country commitment is vital for the success of partnership projects: The lead partner in Montserrat, the Energy Unit at the Ministry for Communications, Work, Energy and Labour (MCWEL), facilitated the engagement with other organisations.

What are the challenges faced by Montserrat's re-sat project?

In-country challenges: o Timing and relevance are important for co-production: The RE-SAT project was well received by Montserrat due to their ambitions to transition to renewables as they saw an immediate opportunity to exploit the platform to their advantage. (Montserrat Energy Policy 2016-2030).

Who is involved in the re-sat project in Montserrat?

The RE-SAT project (Phase 2) in Montserrat acknowledges the invaluable assistance from the Montserrat Ministry for Communications, Work, Energy and Labour (MCWEL), the GIS unit at the Ministry of Agriculture, Trade, Lands, Housing and the Environment; the Montserrat Utilities Limited (MUL), and the Statistics Department.

The Electric Energy OT Security Profile Working Group (WG) hosted by the International Society of Automation ISA99 standards committee commenced in June 2022 the standardization effort of electric energy OT application profiles (substation, generation, DER and SCADA/control center) mapping to the ISA/IEC 62443 standard series.
