

# No need to pay for solar panels

How much money can you save with solar panels?

The average home can save more than £1,100 every year with solar panels! There are several solar panel grants and incentives currently available in the UK, aimed at reducing the cost of solar panels, your households' energy bills and encouraging the adoption of renewable energy. How much could you get?

Do you own solar panels?

You OWN the solar panels. Under these schemes, you pay for solar panels over a fixed period, say 20 years. There are no upfront costs, and instead you pay a monthly fee, which usually covers the solar panel and battery installation, repairs and maintenance.

What grants are available for solar panels in the UK?

Solar-specific grant schemes in the UK include the following: There are currently three government grants available to help with the upfront costs of solar panel installation: ECO4: Funding for energy-efficient retrofits to fuel-poor households, or ones with occupants on certain benefits.

Who can get free solar panels?

The scheme requires medium and large gas and electricity suppliers-- including British Gas, EDF Energy, Ovo, Scottish Power, and SSE -- to help households with energy efficiency measures, including free solar panels (or partial payment) if you are eligible.

How much does a solar panel system cost?

Solar electricity is low carbon, renewable energy. A typical home solar panel system could save around one tonne of carbon per year, depending on where you live in the UK. That's the equivalent of driving 3,600 miles, or from London to Bristol 30 times. The average domestic solar panel system is 3.5kWp and costs around £7,000.

What if I don't qualify for a solar grant?

If you don't qualify for any grants, you have several other options to help with solar panel costs. Under the Government's green incentives, some energy-saving materials and equipment (including solar panels) qualify for a reduced VAT rate.
