Historically, wood has been the main fuel to provide heating. The current energy mix consists of hydro-electric and thermal. Some diesel power and solar photovoltaic panels are also used. Total primary energy supply (2018) was 1,092 ktoe. Biomass: Traditional biomass use for heating and lighting is still prevalent. According to AFREC 2020 statistics, the biomass intensity of the ...

Central African Republic: Ministry of Energy; ENERCA Democratic Republic of Congo: Ministre d'État des Ressources Hydrauliques et Électricité; SNEL Gabon: Ministry of Water and Energy Rwanda: REG (Rwanda Energy Group); EUCL The programme was fully funded by the generous contributions of the Walloon government, to

Demographic profile. The Central African Republic's (CAR) humanitarian crisis has worsened since a coup in March 2013. CAR's high mortality rate and low life expectancy are attributed to elevated rates of preventable and treatable diseases (including malaria and malnutrition), an inadequate health care system, precarious food security, and armed conflict.

Less than 3% of the population has access to electricity in Central African Republic. Grid-based electricity supply is insufficient to meet electricity demand: it is unavailable 28% of the year on average, mainly due to generation outages.

The Central African Republic's economy energy intensity (the ratio of the quantity of energy consumption per unit of economic output) was 7.2 MJ per US dollar (2005 dollars at PPP) in 2012, down from 13.8 MJ per US dollar in 1990. The compound annual growth rate
