

Are Korean EV makers doing better than battery makers?

Korean EV makers are doing better than the battery makers. Hyundai Motor and Kia delivered a total of 509,000 EVs in 2022, including plug-in hybrids, a 42 percent jump on year, according to data from SNE Research. They held 11.9 percent of the global EV market compared to 10.6 percent a year earlier.

Will Korea control 69 percent of US battery market by 2025?

"Korea's battery makers will likely control 69 percent of the U.S. market by the end of 2025," said Lee Anna, a researcher at Yuanta Securities. "With the rules like the IRA that try to rule China out of the game, the growing EV orders in the U.S. market will inevitably raise the demand for batteries from Korean companies."

Does North Korea have a power shortage?

Preface North Korea suffers from chronic energy shortages. Rolling blackouts are common, even in the nation's capital, while some of the poorest citizens receive state-provided electricity only once a year.

Does North Korea have energy security challenges?

Access to solar panels has created capacity where the state falls short, but the overall energy security challenges facing the nation are daunting. This report, "North Korea's Energy Sector," is a compilation of articles published on 38 North in 2023 that surveyed North Korea's energy production facilities and infrastructure.
