

What is the Integrated National Energy & Climate Plan of North Macedonia?

The Integrated National Energy and Climate Plan of North Macedonia elaborates on all five dimensions of the Energy Union i.e. decarbonisation (addressing two segments: greenhouse gas emissions and renewable energy sources), energy efficiency, security of energy supply, internal energy market, and research, innovation and competitiveness.

Who is responsible for natural gas in Macedonia?

JEC GAMA is responsible only for the natural gas pipelines Kriva Palanka, Kratovo and Kumanovo to Skopje, as well as the ring around Skopje, while the state company National Energy Resources is responsible for the construction of the new transmission lines in Macedonia.

Is North Macedonia a state-owned power company?

North Macedonia's state-owned power company was unbundled and partially privatized in the early 2000s. Austrian utility company EVN has been responsible for electricity distribution in North Macedonia since entering the market in 2006.

How much energy does North Macedonia need to make 1 EUR?

In fact, North Macedonia needs to spend 0.24 toe (2.8 MWh) of energy to make 1 EUR, unlike EU28 where only 0.1 toe (1.2 MWh) is needed. Proposed measures, especially in the area of energy efficiency, will increase the productivity without increasing energy consumption, bringing North Macedonia closer to the EU 28 average. Figure 11.

What are the national objectives of the Macedonian energy system?

National objectives with regard to increasing: the diversification of energy sources and supply from third countries for the purpose of increasing the resilience of regional and national energy systems; The Macedonian objective is to fulfil the RES target in 2030, which will contribute to diversification of the energy sources.

How will Macedonia affect the energy system of neighboring countries?

Given the fact that Macedonia will continue to be an import-dependent country, its impact on the energy systems of neighboring countries is very small, especially in terms of defining energy prices.
