Do snowdrifts affect solar power plants in polar climates?

In this study we show that snowdrifts pose a significant challenge for solar power plants in Polar climates as they can grow to cover the plant, resulting in reduced power production and an imposed mechanical load on the PV arrays.

This innovative project is now playing a key role in stabilizing the local grid to handle more wind and solar power so that National Grid can meet its target of operating a zero-carbon electricity system by 2025. Lister Drive is the world's ...
