How much energy does a generator generate?

Normal energy output values are up to 40 RF/t in the Overworld and a constant 40 RF/t in The End. However, this generator cannot generate and emit power at the same time, making it more complex than the solar panels from other mods. The Generator switches to transmitting power when a Redstone signal is applied.

How does a solar generator work?

The Solar Generator has a small internal buffer of 9,600 EU so use of an energy storage cell is strongly recommended. The produced energy can be fed into a power grid via cables or it can be stored into portable storage items, such as the Basic Energy Cube or RE-Battery inside the GUI.
