

Outdoor fiber distribution cabinet Saint Pierre and Miquelon

What is a small outdoor fiber distribution cabinet?

Small outdoor fiber distribution cabinets are often used as the last distribution hub, connecting the network directly to homes with microducts or drop cables. These cabinets are also used as the secondary node in blown fiber access deployments. Drops are installed when the customer requests service.

What is a fiber optic distribution cabinet (FDC)?

The Fiber Optic Distribution Cabinet (FDC), also known as FDC, is designed specifically for the cross-connection of fiber optic feeder cables and distribution cables in Fiber the Home (FTTH) networks. It is also used as a protective enclosure for optical fiber splitters in Passive Optical Networks (PON).

What is an outdoor Telecom cabinet?

The outdoor telecom cabinet is responsible for securing, reserving, and distributing fiber cables, as well as performing fiber splicing, termination, and patching. The Cabinet is highly reliable in terms of sealing, providing excellent waterproof and dustproof capabilities.

What is a large outdoor distribution cabinet?

Large outdoor fiber distribution cabinets are generally deployed as distribution hubs for medium and large neighborhoods, containing splitters for centralized topologies. They are also employed as colocation cabinets, allowing the connection of any home within a medium-size neighborhood to different service providers.

What is a medium outdoor distribution cabinet?

Medium outdoor fiber distribution cabinets are often deployed as distribution hubs in medium or large neighborhoods, containing splitters for centralized topologies. The cabinet is configured with centralized splitting. Microducts are laid individually from terminal closures to each individual home.

How many fibers can a single cabinet support?

Services up to 576 fiber from a single cabinet. Customized ultra high density design upon request.
