

Photovoltaic bracket removal after trial installation

How can Palmetto help you remove and reinstall solar panels?

At Palmetto, our solar professionals are here to help you remove and reinstall solar panels. They can review your situation, provide helpful guidance to ensure your panels are cared for, take care of fixing your home and panels, and make sure your solar power system is reinstalled properly.

Do you need a solar panel removal service?

Considering a solar panel system is a large investment, it makes sense to only let experienced solar installers handle your solar panels and perform this solar panel removal service. Moreover, removing and reinstalling solar panels involves a complicated permitting process that's best navigated by a qualified solar installer.

Why should you hire a solar panel removal service?

A solar panel system is an intricate and complex power plant with electrical connections that only solar experts should handle. Considering a solar panel system is a large investment, it makes sense to only let experienced solar installers handle your solar panels and perform this solar panel removal service.

Can a solar panel be removed from a roof?

Thus, it's best to have your solar panel system removed by trained solar professionals who have the knowledge and equipment to do the job right. While repairing many parts of your solar power system can be done on the roof, it is often much safer to do this work after the panels are removed.

How much does it cost to remove and reinstall solar panels?

For example, Palmetto typically charges \$225 per panel to remove and reinstall solar panels. While the cost to remove and reinstall solar panels depends on the solar company you choose, each company should be able to quote a base price for the work. Prepare to adjust your budget if your roof requires repairs before the panels can be reinstalled.
