Did Hezbollah's solar panels explode?

Lebanon's National News Agency (NNA) has reported that solar panels and walkie-talkies used by the Hezbollah militant group exploded on Wednesday, following a wave of pager explosions the day before. The agency reported explosions of rooftop solar systems in several parts of Beirut, but did not provide additional details.

Can a solar system explode?

"A solar system can not explode unless there are explosives in it," he said. He also said that it is highly improbable that the systems were hacked especially since a hacker needs to work on each system separately.

Did a solar system explode in Nabatieh?

He believes that what probably happened in Nabatieh, in southern Lebanon, on Wednesday was not the solar system itself that exploded but rather a walkie-talkie device near it, adding that he did not hear of other systems exploding in other areas or getting hacked. "A solar system can not explode unless there are explosives in it," he said.

Are solar panels exploding in Beirut?

According to the state-run National News Agency, solar energy systems exploded in homes in several areas of Beirut and the south on Wednesday, but the reports remain unconfirmed.
