

Photovoltaic panels are placed flat on the roof

Can you put solar panels on a flat roof?

One downside of putting solar panels on a flat roof is that they take up more space per kW. When considering what type of roof is ideal for solar panels, many often consider pitched roofs as the only option. Homeowners also often ask "Can you have solar panels on a flat roof?".

How do flat roof solar panels work?

As with normal solar panels, flat roof solar panels convert sunlight into electricity. You can then use this energy to power your home and its appliances, store the excess in a solar battery to use at a later date or sell it back to the grid through the Smart Export Guarantee (SEG).

How much does a solar panel weigh on a flat roof?

As mentioned earlier, solar panels on a flat roof need a heavy ballasted mounting system to stay secure in high winds. And that ballast can make a solar panel up to five times heavier than a typical non-ballasted panel. A ballasted solar panel can weigh around 100kg, whereas a non-ballasted solar panel is only about 20kg.

Do you need planning permission for a flat roof solar panel?

you don't have space for a 0.5-1m border between your solar panel system and the edge of your roof. If any of the above apply, you will need to seek planning permission. How do flat roof solar panels work? As with normal solar panels, flat roof solar panels convert sunlight into electricity.

Can a flat roof damage a solar panel system?

Flat roofs can quickly accumulate standing water, damaging your solar panel system. You'll need proper drainage to prevent water from pooling around the solar panels. You'll also need a tilted mounting system to allow the rain to fall away from the surface of the solar panels instead of collecting on the flat surface.

What angle should solar panels be installed on a flat roof?

With flat roofs, the installer has to set the pitch of the solar panels (typically between 30° to 50°; while the best orientation for solar panels in the UK is southward). This can be beneficial as it allows for optimal angling and positioning for your region.

Yes, you can install solar panels on flat roofs. For these panels, it's important to leave sufficient spacing between the solar panel rows for access and to prevent shading from one row onto the next. While a flat angle ...
