What is a solar walkway project?

Solar Walkway projects support both indoor and outdoor installations in smart cities, as well as smart buildings. Whether it is a new office space, headquarters, hospital or shopping mall, The Solar Walkway combines smart technology and sustainability to your upcoming building project.

How much energy does a walkway solar panel generate?

The panels have an efficiency rating of two-thirds of regular PV panels. They generate up to 35Wp. Each module is 60 x 60 cm. The energy generated is sent back into the grid. 9 sensors on every Walkway module make the floor a powerful touchpad with endless possibilities.

How does a solar walkway work?

The Solar Walkway uses solar energy from the sun to generate power. This power is fed back directly to the local grid or stored in a battery. The electricity can be used to power lights, charge vehicles, or other electronic devices. The floor tiles contain LED lights and are covered with a walkable glass layer to encourage engagement with citizens.
