

What is the energy sector in Rwanda?

The energy sector in Rwanda is made up of three sub-sectors: power, hydrocarbon and new and renewable sources of energy. Amongst the renewable sources of energy are biomass, solar, peat, wind, geothermal and hydropower. Biomass is the most used and dominates both the demand and supply sides of the Rwandan economy.

What is Pioneer Energy's recycling ECT &#174;?

Pioneer Energy's Recycling ECT &#174; can be used for hydrocarbon miscible EOR projects to reduce injectant operating costs. The system extracts NGL components from the produced fluids, making them available for the EOR process. This can significantly increase the amount of oil that is recoverable over the lifetime of the well.

What impact does Rwanda's Energy Transition have on households?

The impact of this transition reaches far beyond individual households. In the context of Rwanda's commitment to clean energy, the government has set forth policies to promote renewable solutions and energy efficiency.

Is Rwanda facing an energy crisis?

Several indicators point to an energy crisis in Rwanda including: accelerated deforestation, a biomass energy deficit and deterioration in electricity generation and distribution systems. The major part of the energy consumed in Rwanda today still comes from wood (80.4 per cent).
