The Pitcairn Islands have exceptionally stunning dark skies, free from all light pollution. In late 2018 the Government of Pitcairn Islands made application to the International Dark Sky Association (IDSA) for the 4 islands in the Pitcairn Islands group to be granted the status of an International Dark Sky Sanctuary (IDSS).

Various forms of evidence show the earliest settlers of the Pitcairn Islands were Polynesians who occupied Pitcairn and Henderson for several centuries until the islands were abandoned: Henderson most likely before the 16th century and Pitcairn in the 17th or early 18th century. The islands were uninhabited when they were discovered by Europeans.

The economy of the Pitcairn Island is best described as a nano-economy. This is not difficult to understand, given the tiny size of the population and the even smaller working population, the limited areas for economic exploitation, and the difficulties presented by infrequent access to this tiny island in the middle of the South Pacific.
