

The system is designed for easy deployment, shipped with batteries installed, and can operate autonomously or be integrated with higher-level energy management systems. Remote control and monitoring are handled via the Pixii Gateway, ...

The PowerShaper XL family is based on the PixiiBox, the bi-directional AC/DC power conversion module that is the basic building block of all Pixii's systems. "The launch of the PowerShaper XL family is a milestone for ...

Milence selected Pixii to develop a robust and scalable BESS for the Venlo charging hub. A Pixii PowerBase system was installed with a 520 kW / 1.1 MWh battery energy storage capacity, ...

At the core of the Pixii PowerShaper is the "Pixiiibox" - an advanced bi-directional power conversion unit. This unit allows energy to flow in two directions; from the grid to the battery and back to the grid again.

Pixii PowerShaper combines state-of-the art technology with high performance efficiency, reliability and reliability. Users can maximize the storage of energy and use with features such as smart grid integration and advanced ...
