

Portugal best power station 2024

How can Portugal meet growing energy demands in a sustainable way?

Meanwhile, the rapid expansion of hydroelectric and solar energy capacity is helping Portugal meet growing energy demands in a sustainable way. These efforts align with European Union objectives, such as the RePowerEU plan and the Renewable Energy Directive, which targets 42.5% renewable energy in total consumption by 2030.

How much energy does Portugal generate from renewables?

Portugal generated an 'historic' 95 per cent of its electricity from renewables in April, according to the network operator REN. Renewable energy generation averaged just below that for the first four months of the year, covering 91 per cent of the nation's power needs.

Is Portugal a good renewable leader?

Portugal had the third highest share of wind energy in its electricity mix last year at 29 per cent, behind Ireland (36 per cent) and Denmark (58 per cent). But, as elsewhere, it's no good a renewable leader resting on its laurels.

What construction works are being done in Portugal?

Daivões construction works. Alto Tâmega construction works. The Tâmega giga battery will provide almost 900 MW of pumping capacity to the Portuguese electricity system, which is an increase of more than 30 % compared to the megawatt capacity available to the country today.

Does Portugal still have wind power?

Ember's new European Electricity Review report notes that Portugal has still not moved past the peak in wind generation it achieved in 2019. This is despite its updated National Energy and Climate Plan assuming a "swift doubling" of current wind capacity, from 5 GW in 2022 to 12 GW in 2030.

Does Portugal have a 'swift doubling' of wind power?

This is despite its updated National Energy and Climate Plan assuming a "swift doubling" of current wind capacity, from 5 GW in 2022 to 12 GW in 2030. Portugal has made huge progress in renewable power, up from 27 per cent in 2005 and 54 per cent in 2017.
