

How much energy does Portugal generate from renewables?

Portugal generated an 'historic' 95 per cent of its electricity from renewables in April, according to the network operator REN. Renewable energy generation averaged just below that for the first four months of the year, covering 91 per cent of the nation's power needs.

Does Portugal have a high level of electrification?

Portugal has a high level of electrification. In 2019, electricity covered 25% of the total final energy demand, 56% of building energy demand, and 25% of industry energy demand, according to IEA. A significant portion of the electricity in Portugal is produced through a renewable source, over 50%.

What percentage of electricity is produced in Portugal?

In 2019, electricity covered 25% of the total final energy demand, 56% of building energy demand, and 25% of industry energy demand, according to IEA. A significant portion of the electricity in Portugal is produced through a renewable source, over 50%. Wind power amounted to 24% of the electricity production.

How can Portugal meet growing energy demands in a sustainable way?

Meanwhile, the rapid expansion of hydroelectric and solar energy capacity is helping Portugal meet growing energy demands in a sustainable way. These efforts align with European Union objectives, such as the RePowerEU plan and the Renewable Energy Directive, which targets 42.5% renewable energy in total consumption by 2030.

Is Portugal a good renewable leader?

Portugal had the third highest share of wind energy in its electricity mix last year at 29 per cent, behind Ireland (36 per cent) and Denmark (58 per cent). But, as elsewhere, it's no good a renewable leader resting on its laurels.

Why is wind energy important in Portugal?

Wind energy remains a crucial component of Portugal's electricity production, accounting for 25% of the total. Meanwhile, the rapid expansion of hydroelectric and solar energy capacity is helping Portugal meet growing energy demands in a sustainable way.
