

# Previous tax rates for solar power generation

How do tariff rates for solar PV installations work?

The amount of generation which is deemed to be exported is set by the Secretary of State for the Department of Energy Security and Net Zero each year in their annual determinations. Tariff rates for Solar PV installations are uniquely split into Higher, Middle and Lower bands.

Are solar panels a special rate?

Before 1/6 April 2012 solar panels including photovoltaic varieties, which generate electricity, and solar thermal systems, which provide hot water, were generally treated as special rate on the basis that they were integral features of buildings or structures CA 22300 or long life assets CA23700.

Do solar installations qualify for HMRC tax relief?

HMRC regard solar installations as a long-life asset, which sometimes reduces relief. However, the installations do qualify for 100% Annual Investment Allowance (which is available for up to £1,000,000 of total qualifying expenditure by most standalone farming sole traders, partnerships or companies in the year ending 31 March 2023).

Is there a zero-rate VAT on solar panels?

A zero-rate of VAT on the installation of energy-saving materials (ESMs), including solar panels, in residential accommodation, was introduced on 1 April 2022. At the time, it only applied to England, Scotland, and Wales. Following a new agreement between the UK and the EU, the zero-rating was also implemented in Northern Ireland on 1 May 2023.

Will a solar PV system 'inflation proof'?

So, fitting a solar pv system to an 'old' house - one that's already been lived in as against a brand new development - will yield a Generation Tariff of 43.3 pence per KWh of energy produced, for the next 25 years - and the Tariff is linked to the Retail Price Index so it should be 'inflation proof'.

What are the tax rules for electricity installation?

There are two different sets of tax rules, depending principally on whether the installation is domestic or commercial. The contract documentation will state the type of installation. A domestic installation is normally mounted on the farmhouse roof (occasionally in the garden) and provides electricity solely to the dwelling.

The new rules will replace the old feed-in tariff (FIT) scheme, which closed to new applicants on 31 March 2019. However, unlike the FIT scheme, which paid households for all electricity they generated and exported, ...

In addition, a comparison is made between solar thermal power plants and PV power generation plants. Based

## Previous tax rates for solar power generation
