Promethean Power Systems designs and manufactures innovative cooling systems to enable access to sustainable cold chain. | Promethean designs and manufactures modular energy storage systems for refrigeration applications. Our energy efficient solutions include bulk milk coolers, rapid milk chillers, cold ...

Through his company Promethean Power Systems, Grama was able to develop a thermal battery that can replace diesel generators as a more cost-effective backup power source. The thermal battery charges itself from the main power source, requiring only about five hours of energy within a 24-hour period. If the main power goes out, the thermal ...

Promethean Power Systems designs and manufactures energy storage systems that are redefining the cold chain in developing countries. Its patented thermal energy storage technology enables energy-efficient refrigeration of fresh food items as they make their way from smallholder farmers in rural villages to processing plants and customers in distant cities.

Acumen has invested \$1 million in Promethean Power Systems, a company producing off-grid rural milk chillers in India. Access to reliable power supply remains a challenge in rural India: in 2018, an average of only six of India's 29 states had 24-hour power supply in rural areas. The lack of energy poses a storage and ...

Dairy innovator Promethean Power Systems is helping bring better prices, reliability and transparency to smallholder farmers. Sustainable technology connects farmers with national supply chains for the first time - and helps women take on new roles in their communities. Region: India. Visit Promethean's website for more information.

Promethean's Micro Can-Chillers are cost-effective way to ELIMINATE SPOILAGE & procure HIGHER MBRT milk by arresting bacterial growth at the VLCC & farm level itself. These stand-alone units can chill UPTO 6 CANS PER SHIFT & can be a great add-on to an existing "Chilling Centers" to expand its catchment area & also REDUCE COST OF PRIMARY ...

Promethean's Conventional Milk Chiller is a modular milk chilling system that can cool from 35 o to 4 o C without a diesel generator. The capacity of the system ranges from 500 Litres/Day to 2000 Litres/Day. It works even if there is no power during the milk collection by using only 4 hours of intermittent grid power between each milking shift.

Promethean Power Systems designs and manufactures refrigeration systems for cold-storage and milk chilling applications in off-grid and partially electrified areas of developing countries. Our goal is to empower smallholder farmers through ...

Where is Promethean Power Systems headquartered? Promethean Power Systems is headquartered in Somerville, MA. What is the size of Promethean Power Systems? Promethean Power Systems has 34 total employees. What industry is Promethean Power Systems in? Promethean Power Systems's primary industry is Electrical Equipment. Is ...
