

16 ????· Last year, the United States imported 38.9 million megawatt hours of electricity, according to the US Energy Information Administration. The vast majority of that - 33.2 million ...

Solar energy has continued to grow rapidly across the United States in 2024, cementing its position as a crucial component of the nation's renewable energy strategy. Advances in solar technology, combined with supportive federal and state policies, have enabled a significant expansion of solar installations in both residential and utility-scale sectors. The reduction in ...

The United States Energy Association (USEA) is a nonprofit, apolitical, nonlobbying organization founded in 1924. USEA's mission has two pillars of equal importance. USEA serves as a resource, by convening energy stakeholders to share policy, scientific, and technological information to foster the advancement of the entire energy sector.

Economic growth depends on reliable energy, and there is no bigger growth market than in sub-Saharan Africa. When power comes to a community for the first time, new businesses are formed, children are able to attend school longer, and existing businesses buy new appliances to take advantage of their new energy access.

Minigrids do not just bring reliable, clean electricity to communities for the first time, they transform lives. Suddenly, where there was no electricity or light, children study at night, businesses expand and buy new appliances, and new business ideas come to life.

16 ????· Canada could retaliate against President-elect Donald Trump's threatened tariffs by shutting down energy flows to the United States, a top Canadian official warned.

The rare observation of transient Rh···Rh excimer formation in a single crystal is reported. The estimated excited-state lifetime at 100 K is 2 ns, which makes it the shortest ...
