

Register on the Solar Energy Platform Montserrat

Who provided the power data for the solar PV project in Montserrat?

The power data was kindly provided by the Government of Montserrat. Figure 16: Placard for the 250kW solar PV project in Montserrat. Renewable Energy planning in Montserrat

Why do we need solar panels in Montserrat?

The use of Solar Panels meets one of the Governments priority needs which is to improve energy security by slowly transitioning to renewable energy. The incorporation of Solar into the Grid on Montserrat, resulted in a 13% renewable energy input on the grid, which is 3% above the European Union's key performance indicator (KPI) of 10% .

Why should Montserrat invest in re-sat projects?

The RE-SAT projects has provided the Government of Montserrat with a new renewable energy platform that has been used to support their transition to renewables and a climate resilient future. Montserrat has a vision of achieving 100% renewable energy grid penetration by 2030.

What is Montserrat's energy policy?

The first Energy Policy was approved in 2008 by the Government of Montserrat. The policy was then revised and updated in 2016 to include Government incentives and to update the policy with appropriate targets. The new Energy Policy (The Power to Change) that is currently being implemented runs from 2016 to 2030. Progress made so far includes: -

Who is our partner in Montserrat?

Our lead partner in Montserrat is the Energy unit within the Ministry of Communications, Works, Energy and Labour (MCWEL).

Who is involved in the re-sat project in Montserrat?

The RE-SAT project (Phase 2) in Montserrat acknowledges the invaluable assistance from the Montserrat Ministry for Communications, Work, Energy and Labour (MCWEL), the GIS unit at the Ministry of Agriculture, Trade, Lands, Housing and the Environment; the Montserrat Utilities Limited (MUL), and the Statistics Department.

The first Energy Policy was approved in 2008 by the Government of Montserrat. The policy was then revised and updated in 2016 to include Government incentives and to update the policy with appropriate targets.

Manufacturers and importers can apply to list their product models on the register. Learn how to register a solar water heater. Register. There are 3 types of systems included on the register: air source heat pumps with a capacity of no more than 425 L; solar water heater models with a capacity of less than 700 L (mostly
