

Do you need a maintenance contract for a solar PV system?

As having a working solar PV system will save you money on your electricity, it is best to allow access for any maintenance or repairs needed. Residents do not need to agree maintenance contracts or fees with any company. Solar PV systems have no moving parts and generally require little maintenance.

Why do solar panels need maintenance?

This is because dust, debris, and the effects of the weather can impair the performance of the photovoltaic cells over time. Maintaining your solar panels ensures that they are always working at peak efficiency. But what exactly does "maintenance" mean for solar panels, and...

How can I reduce the amount of maintenance my solar panels require?

The easiest way to reduce the amount of maintenance your solar PV panels require is to choose the right installation location. A location that's protected from dust and debris and far from trees will typically require the lowest amount of maintenance. Your solar installer will calculate the optimal angle for your solar panels.

Are solar panels easy to maintain?

Compared to other renewable energy systems, solar panels are also extremely easy to maintain. Their design, which has no moving parts, means that common failures of other renewable energy systems simply aren't an issue with solar.

What happens during a solar PV service?

During a service various checks will be carried out, including various inspections and electrical tests. It's really important to monitor the output of your solar PV system. If you have a system with online monitoring, such as SolarEdge, this should be easy.

How long do solar panels last?

The lifespan of the solar panels is about 25 years; however, the inverter may require replacing after about 7 to 10 years. There is likely to be some deterioration in performance over time - solar panels are typically guaranteed to provide 90% power output after 10 years. How do I know that my solar PV system is working?

Contact our team in Rochester, Kent today for more information about solar panel installation and maintenance. ... Solar panels typically need around four hours of sunlight a day to function ...

Solar panels are a low-maintenance investment, but there are a few things you can do to keep them running at their best. Here's everything you need to know about solar panel maintenance.
