

What is Bess & how does it work?

The first-stage BESS in Constanta County uses Prime Batteries' technology and will consist of 132 battery strings with 114,048 lithium-ion cells. The unit will store electricity from the Mireasa wind park and the 35-MW under-construction Galbiori 2 PV plant that should go online this year.

Where can I buy a Bess battery in Romania?

If the BESS may be purchased directly from the manufacturer in some countries, most manufacturers do not have retail stores in Romania. The battery is purchased from either the distributor, who can offer free shipping, or from the manufacturer with stores in other countries and adds the costs for shipping.

How long does a Bess last?

Even if AIHBs are still in the research-development stage, some commercially available solutions can be found. This type of BESS has a lifetime of around nine years, approximately 3000 life cycles at a 70 % DoD and a charge/discharge efficiency of 90 %.

Examples of BESS integration in Romania . 11:45 - 12:00 Coffee break. 12:00 - 13:15 SESSION 2 - Regulations for network integration of BESS solutions. We will focus on the policies and regulations needed to integrate BESS into the Romanian energy grids, discussing the legislative challenges and the impact of decarbonisation policies.

BESS can store energy from various sources such as the electrical grid and renewables. By storing energy from the grid during off-peak periods when electricity rates are lower, BESS can discharge this stored energy back into the grid during peak periods when demand is higher. Battery energy storage systems" benefits include:
