

Safety storage cabinet Timor-Leste

Which storage facilities are covered by the Timor-Leste fuel regulation?

This Regulation shall cover all Storage Facilities for Fuels installed or to be installed in the territory of Timor-Leste, irrespective of the nationality and nature of the entities that own or operate them.

Why did the ANPM change the storage standards in Timor-Leste?

These changes mainly pertain to adjustments to the implementation of the applicable standards due to a better understanding of how they should be applied to storage facilities in the context of Timor-Leste, to ensure the general safety of the population. The ANPM also considers it convenient to review the applicable fees and insurance rules.

What are the requirements for fire safety storage cabinets?

Requirements are given in respect of the construction of the fire safety storage cabinet and its capacity to resist fire conditions on the outside. A classification of fire safety storage cabinets is given, according to the level of fire resistance offered, and a type test is included, see Annex A.

What if a storage facility is not approved by ANPM?

Should the location of an existing Storage Facility not be approved by the ANPM the operator must file a proposal for bringing the facility in compliance with the location rules or for mitigating the risks arising out of such non-compliance, within 180 days of being served notice of the ANPM's refusal to approve the location.
