

After the upper house, the Senate, voted to pass the legislation on 20 May, the bill is now effectively enacted and awaits the signature of Connecticut Governor Ned Lamont. The national Energy Storage Association ...

The group was founded four years ago by the US Energy Storage Association (ESA), California Energy Storage Alliance (CESA), China Energy Storage Alliance (CNESA), Germany's storage association BVES, the global Alliance for Rural Electrification (ARE) and IESA. Its goals include the advancement of education, knowledge, collaboration and the ...

With Virginia now one of seven US states with a form of energy storage target in place, Virginia's goal slightly outdoes the next largest, New York's, which was set at 3GW by 2040. With that in mind, the Virginia State Corporation Commission - which has the authority to regulate numerous sectors including everything from utilities to insurance - issued its ...

With the broad expansion of investment tax credit and production tax credit (PTC) programmes brought in with last year's Inflation Reduction Act (IRA) legislation and set to remain in place until the early 2030s, there has been great positivity around the US energy storage industry.. This was especially the case as, for the first time, an ITC was introduced for ...

Canada was also elected to the board of directors at the US national Energy Storage Association (ESA) in April 2020. Highview Power's emissions-free cryogenic battery (which it calls "CRYOBattery") technology is based on chilling ambient air using conventional industrial refrigeration techniques to temperatures below -270°F (-170 °C ...

The National Renewable Energy Laboratory (NREL) in the US has forecast dramatic cost reduction trends for battery energy storage to continue on a rapid trajectory to 2030 with reductions continuing at a slower pace through to 2050. ... interim CEO of the US national Energy Storage Association (ESA) noted yesterday on Twitter that by 2030, 10 ...

The slow progress was explained in a 2020 interview with then-policy director at the Energy Storage Association (ESA), Jason Burwen, who discussed the difference between the states that have set energy storage ...

We are evaluating opportunities to invest over US\$1 billion across the US in locations with an urgent need for energy storage." Burwen, known in the industry as the former policy lead and later interim CEO of the Energy Storage Association (ESA, since merged with the American Clean Power Association), joined Gridstor a few months ago.

Energy-Storage.news reported last week that a Koch Industries strategic investment subsidiary is investing US\$100 million into Eos. Granholm was accompanied by House Energy and Commerce Committee Chairman ...

According to our latest U.S. Energy Storage monitor, published in conjunction with the Energy Storage Association (ESA), 36 megawatt-hours of grid-connected residential energy storage systems were deployed in the first ...

The irrepressible Jason Burwen, Interim CEO of the national Energy Storage Association (ESA), said via Twitter on 30 July that he had taken a closer look to see what was in the framework for energy storage. In all, he applauded the Senate for the bill's passing, noting that many of the things included met recommendations the ESA had put forward.

The Energy Storage Association is the leading national voice that advocates and advances the energy storage industry to realize this goal--resulting in a better world through a more resilient, efficient, ...

The US national Energy Storage Association (ESA) has advocated that the nation should aim to deploy 35GW of energy storage by 2025, claiming it could result in US\$4bn of network cost savings and generate 167,000 jobs. Navigant on energy storage as "non-wires" alternative for utilities and grid operators.

Despite making huge strides forward, the energy storage industry's work in helping stakeholders across the value chain understand the technologies and the roles they can play in a renewable energy future is far ...

The slow progress was explained in a 2020 interview with then-policy director at the Energy Storage Association (ESA), Jason Burwen, who discussed the difference between the states that have set energy storage targets as policies with follow-through mechanisms in place to make them happen, and what could be called aspirational goals without ...

Guidelines for lithium-ion battery storage system decommissioning and recycling have been launched in the US by the national Energy Storage Association, while associations in European Union territories as well as the US have come together to launch an online information portal on the safe transportation.
