

About this station. SaintFM (a privately-owned Limited Company) was St Helena's first FM radio station and also its first independent-of-government broadcaster. It was entirely self-funding, receiving income from advertising; it received no ...

Saint Helena, a remote island located in the South Atlantic Ocean, has a small population of approximately 4,000 residents. The island's remoteness has historically posed significant challenges for telecommunications, resulting in a reliance on satellite communications. However, in February 2023, the island was connected to Equiano, a subsea cable linking South Africa ...

capacity from wind power amounted to 432,883 MW and increased by 17% compared to the previous year (369,553 MW). Denmark produces 39% of its energy through wind power and as of 2014 3.1% of the global energy production comes from wind with China leading St Helena has already embraced wind power and there is scope for further development of

St Helena Island is one of the remotest Islands on Earth. It is a subtropical paradise where the mountainous terrain and micro-climates create an astounding diversity of landscapes all within a few minute's drive. The Island is a breath of fresh air in today's world, boasting clean air, a sparkling ocean environment, a safe community (pop ...

Despite St Helena lying within the tropics, the south-east trade winds make the island's weather mild and often unpredictable. Temperatures can vary across the island; Jamestown can experience temperatures from 14°C to 32°C, while the forested, mountainous interior can witness the mercury flicker between 8°C and 26°C. As a rule of thumb, St Helena's ...

Saint Helena was born at Drepanum, a small town on the shore of the Black Sea in Bithynia, now Turkey, in the year 248 A.D. We know little about her early life, except that she worked at an inn, or a post-stable, on one of the imperial trunk roads. Early accounts of her life refer to her as a "stabularia", which is interpreted as "barmaid".
