

How does Saudi Arabia generate electricity?

According to Nicolas Daher, the EIU's lead energy analyst, Saudi Arabia "currently generates almost all of its electricity from fossil fuels, of which 60% comes from natural gas and about 40% from oil". By 2030, it aims to achieve a true energy mix for electricity production, with renewable energy contributing around 50%.

Will Saudi Arabia generate 50% of its electricity from renewables?

In January 2021, Saudi Arabia announced its intent to generate 50% of its electricity from renewables by 2030, with the other half coming from natural gas-fired power generation (Paraskova, 2021). The total renewable energy installed capacity in Saudi Arabia has increased from 3 MW in 2011 to 413 MW in 2020 (Figure 3).

How much power does Saudi Arabia need?

Saudi Arabia has established a goal to source at least 50 percent of its power from renewable energy by 2030, expanding its capacity to 130 gigawatts (GW), 58.7 GW of which is expected to come from solar and 40 GW from wind. This target is the most ambitious of its kind among Gulf Cooperation Council (GCC) countries (Figure 1).

How big is Saudi Arabia's renewable power capacity?

The NREP specifies renewable power capacity should rise to 58.7 GW by 2030. Saudi Arabia has significant wind and solar potential, estimated at almost 1000 TWh (nearly 17 times larger than that of Germany) and 145 TWh, respectively.

Why is Saudi Arabia transitioning to independent power and water projects?

Saudi Arabia is transitioning towards independent power and water projects to address the escalating power requirements and broaden the array of energy sources via the National Renewable Energy Program. This will be accompanied by a substantial rise in non-oil government income and the private sector's contribution to GDP. 1.

Will Saudi Arabia invest \$270 billion in low-carbon energy projects?

Saudi Arabia has declared its intention to invest \$270 billion in low-carbon energy projects by the year 2030. Table 3 shows major investment projects in Saudi Arabia for energy transition. Table 3. Overview of major investments in Saudi Arabia's energy transition and RE initiatives RE = renewable energy; SAR = Saudi Riyals.
