Can Saudi Aramco extract lithium from oilfield brine?

Saudi Aramco and Abu Dhabi National Oil Company are teaming up to extract lithium from oilfield brine, as the Gulf states advance their move into electric vehicles production. Saudi Crown Prince Mohammed bin Salman is dedicated to finding alternative sources of energy and is leaving oil in the ground.

Why is Saudi Arabia planning a second lithium processing facility?

Saudi Arabia is planning a second lithium processing facility, as it steps up efforts to work with western partners to develop its battery supply chain. The facility, which will use feedstock mined in Austria to produce refined lithium hydroxide for BMW, is a sign of how supply chains to process the metal are slowly developing outside China.

Will Saudi Arabia develop a lithium hydroxide plant in 2026?

Earlier this year Saudi Arabia signed an agreement with EV Metals, an Australian battery manufacturer, to develop a lithium hydroxide plant that will be in production in 2026. Lithium processing is highly energy intensive and Sage said Saudi Arabia was an attractive location for a processing facility because of its cheap energy.

Who is Middle East Battery Company?

Middle East Battery Company has the latest and largest advanced technology plant in the region engaged in manufacturing automotive sealed maintenance free batteries for all types of cars.

Is Saudi Arabia leaving oil in the ground?

Saudi Crown Prince Mohammed bin Salman is dedicated to finding alternative sources of energy and is leaving oil in the ground. Lithium is critically important for EVs, due to its use in the manufacturing of batteries. Lithium forms the core of rechargeable lithium-ion batteries and offers high energy density, allowing for longer driving ranges.

What does Saudi Arabia's oil wealth mean for EVs?

Saudi Arabia's oil wealth means it can afford to establish itself as a hub for EVs to make use of whatever lithium it produces. The kingdom has established its own EV brand - Ceer - and has built an EV metals plant. The Kingdom's sovereign wealth fund, the Public Investment Fund, is set to fund 500,000 EVs annually by 2030.

While the release said the JV partners want to be a "global leader and champion" in the energy storage market, it is expected to also "directly contribute to the Kingdom's renewable ambitions," with Saudi Arabia targeting the installation of 57.5GW of renewable energy capacity by 2030 and energy storage will be used to help connect ...
