Much research has been done to support the fact that, although an EPC provides a snap shot in time of a building's modelled energy performance, and a good EPC is better than a bad, it often has little correlation with the actual operational energy usage over a building's lifespan, as read on the building's energy meter and reported on bills.

Energy Volatility, meet flexibility. At Savills, we understand how quickly things change in the energy industry, and how the right real estate strategy can power growth. We'll partner with you to perform a portfolio assessment, listening carefully to your challenges and using our experience to help you see real estate in new ways.

Savills Energy, Procurement & Sustainability team has signed a two-year deal with The Doyle Collection to procure 100% renewable energy for their portfolio of 7 hotels across Ireland and the UK and their London and Dublin head offices. For the UK hotels, green gas has also been procured with Renewable Energy Guarantees of Origin (REGO) ...

The firm will work towards zero net energy consumption, achieving an overall balance between emissions produced and emissions taken out of the atmosphere, building on the positive foundation of its progress to date. ... Savills UK has aligned its targets with nine of the 17 UN Sustainable Development Goals, which act

as a blueprint to achieve a ...

To become an energy consultant is a unique occupation at Savills; therefore, graduate trainees must be enthusiastic to learn about all aspects of the energy profession and how these relate to land and property asset owners. This work stream is open to graduates with engineering, science and surveying university qualifications.

Director Savills Residential Sales & The Private Office &#183; William is a qualified chartered surveyor and has a broad cross-residential market perspective, having worked in both the prime country house and London markets. With over 20 years experience in agency, he is in a unique position to be able to share insight into both markets and connect clients with the most ...

The drive for residential energy efficiency will affect the entire private rented sector, but rural landlords are likely to feel the impact more than their urban counterparts ... The most recent Savills estate and farm staff salary survey shows that over two-thirds of full-time staff have accommodation provided and 73% of those staff receive ...

Highlights include: Our 2021 carbon emissions were reduced by 44.5% compared with 2018

Simply replacing one set of large-scale centralised generators with another will not be enough to solve our energy problems. Cookies are a small file saved on your computer that help store preferences and other information that"s used on the web pages you visit.

Savills has recently expanded its Savills Earth team with the appointment of Chris Phillips, who joins as an associate in energy based in the Perth office. Chris has over 11 years" experience in pre-planning utilities statements and engagement with utility networks to deliver electricity, gas, water and telecommunications to clients.

The energy efficiency of our homes is benchmarked through EPCs, with all properties that are let or sold being given a score that translates into a rating from A (the most energy efficient) to G (the least). The Government has a stated ambition to upgrade all homes to EPC level C by 2035, where it is cost efficient to do so.
