So I have used rePackr to build my first 14s80p packs and ea. worked out to 180ah per cell pack, I am now wanting build my next 14s80p and I have more than enough cells, when I use rePacker there is no option to specify both cells in parallel and pack capacity, the idea is to have rePackr build the next 14 packs @r 180ahea. using 80 cells per pack out of all the ...

Not by a whole lot around 100mAh. I was testing LGGBM261865 cells most tested ~2650-2750 mAh but a few test in the low 2800"s. I Think a combination of things happened 1st the cells were on the high end of capacity second the cell was tested in aslot that always tests high. So it is possible to get high numbers for cells. Later floyd

Thanks very much for this information. I recently got about 150 of these cells. Most tested in the 1400-1700 mAh range.Now I can check to see if they are still reasonable cells (G3-G5), or well used and closer to end of life(G6+).

Second life energy storage and BMS firm Element Energy has commissioned the largest project in the world using repurposed EV batteries, it claimed, with LG Energy Solutions (ES) Vertech revealed as a system integration partner going forward. ... The increasing cost-competitiveness of LFP battery cells has made first

life batteries more ...

Drivers of demand for second life energy storage . For second life ESS solutions specifically, sustainability is a big one. Evyon's Ralph Groen says that it is becoming more and more of a driver for C& I customers and project proposals are now scored on their supply chain circularity, from 1-10.
