

Selecting Solar Panels

How do I choose a solar panel?

When choosing a solar panel, it's important to consider what it's made of and the quality of its build. Frame: Encases and supports the solar panel structure; aluminium offers the best durability and rigidity. Glass cover: Tempered glass protects solar cells while allowing daylight to pass through.

How do I choose the best solar panels in the UK?

Efficiency standards: Selecting solar panels with high efficiency ratings will help you optimise your energy production. The best panels in the UK generally exceed 20% energy efficiency, providing more power output per square metre of roof space.

What should you consider when buying solar panels?

Efficiency, performance, durability, warranty periods, reputation, and cost are some of the key comparisons homeowners make when buying solar panels. Do your research to narrow down your selection based on your needs and contact a local solar panel installer for expert advice.

How do I choose a solar panel for my roof?

Decide on how much of your electricity bills you want to cover with your solar panel usage -- this can be anything from 10-100%. Your decision will affect the system size and costs. Calculate how many solar panels fit your roof. An average solar panel takes about 1.44 m² of roof space. Don't forget to include at least 30 cm from the roof's edge.

What makes a solar panel a good choice?

Frame: Encases and supports the solar panel structure; aluminium offers the best durability and rigidity. Glass cover: Tempered glass protects solar cells while allowing daylight to pass through. Polymer sheet: Adds another layer of protection. Cells: Made from silicon, these convert sunlight into electricity.

Who makes the best solar panels?

We compared manufacturer data, independent reviews, and third party accreditations for all 322 available solar panel models on the market. According to our findings, the brands with the best solar panels include REC Group, Sunpower, and AIKO.
