The Challenge. Thirty per cent of Senegal's households did not have access to electricity in 2019. And while 70 per cent electrification nationwide is among the highest rates in sub-Saharan Africa, it hides strong disparities ...

China is set to cement its position as the global renewables leader, accounting for 60% of the expansion in global capacity to 2030. The country is forecast to be home to every other megawatt of all renewable energy capacity installed worldwide in 2030, after surpassing its end-of-the-decade 1 200 GW target for solar PV and wind six years early.

In Senegal, about half the rural population lacks a reliable source of power and consumers who have electricity pay some of the highest rates on the continent. With about 82 percent of Senegal's electricity generated from fossil fuels, the country also needs to diversify to cleaner sources of power.
