

To reinforce Djibouti's position as an emerging energy leader, the SIHD plans to develop an oil refinery in the Damerjog industrial park. The refinery will have an initial production capacity of 25,000 bpd - amounting to roughly 1.2m tonnes per year - with the ultimate objective of processing 220,000 bpd.

Enhance Energy Autonomy: The activity will contribute to Djibouti's larger goal of producing 100 percent of its own energy through renewable sources by 2035. The waste-to-energy plant will help Djibouti become one of the largest exporters of energy by-products on the continent. FAST FACTS. Budget: \$1,200,000

Shmoos International Energy Co is your one-stop destination for all your electrical, plumbing, CCTV, door camera, A/C contracting, and maintenance needs. Our dedicated team is ready to ...

Djibouti: Energy intensity: how much energy does it use per unit of GDP? Click to open interactive version. Energy is a large contributor to CO 2 - the burning of fossil fuels accounts for around three-quarters of global greenhouse gas emissions. So, reducing energy consumption can inevitably help to reduce emissions.
