If you want to go completely off the grid, the cost of using a stand-alone wind turbine system will be much higher than a hybrid wind-solar system. A more economical approach is a 3:1 ratio. For example, a 3kw wind-solar hybrid system uses a 1kw wind turbine, a 2kw solar panel, and other accessories. In this way, the cost ratio will be reduced.

A summary of Sint Maarten's solar markets. In 2014, Sint Maarten's council of ministers sanctioned the National energy policy document. This document was supposed to usher in a new era of renewable energy in the Caribbean Island country. More specifically, the policy document envisioned an 80% renewable energy capacity by 2020.

Some utilities will not allow you to sell your excess production back, or will just pay you pennies for feeding your precious solar energy back to the grid. The use of solar energy for self-consumption (or zero grid export) is your best option by ...

If you do not need the solar system to power all your home appliances temporarily, it is also a smart choice to consider using solar AC units. It will save on your electricity bill. Air conditioning seems to have become a necessity for modern households, accounting for 20%-30% of the total electricity bill. In summer or winter, you can use air conditioning to keep your home comfortable.
