Is a 60 kWh battery a 'flying colour'?

Perth-based Altech said a prototype 60 kWh sodium chloride solid state battery energy storage system installed at joint venture partner Fraunhofer IKTS' test laboratory in Germany has passed all physical tests with "flying colours." The ABS60 battery pack is composed of 240 Cerenergy cells, each rated at 2.58 V.

What is a 60 kWh battery pack?

Cross Section of 60 KWh ABS60 Showing Vacuum-sealed Pack and Cell Frames The 60 KWh Battery Pack (ABS60) is rated at an operating voltage of 600 volts and 100 amp (Ah). The battery is designed to provide battery backup and excellent performance in grid-tied commercial applications for an uninterrupted power supply.

What is a 60 kWh sodium chloride solid-state battery energy storage system?

The prototype 60 kWh sodium chloride solid-state battery energy storage system has been integrated into a specially designed test station. The integration is aimed at enabling daily charging and discharging cycles to assess the battery's efficiency on a regular basis.

How many cerenergy cells are in the abs60 battery pack?

The ABS60 battery pack consists of 240 Cerenergy cells, each with a rating of 2.58 V. The joint venture believes that the battery is ideally suited for the grid storage or long duration energy sector where very high power in a short period of time (like high power EV) is not required.

Where are abs60 batteries made?

They are produced in Germany with local supply chains, responsibly and environmentally friendly. The ABS60 battery pack consists of 240 CERENERGY cells; cells (with a nominal voltage of 2.5 V each) arranged in four rows of 12 cells each, finally.

Who is establishing the abs60 battery factory?

Where the plant has been established by Fraunhofer IKTS ("Fraunhofer") and the Altech Group. A feasibility study is currently being prepared (see Corporate News of 26 October 2022). The battery factory is now being designed to produce ABS60 battery packs as a
