

Solar backup power supply for home Seychelles

A grant from the German Government made this solar installation possible. Now, thanks to a 25,000 Euro grant from the German Federal Foreign Office, through the German Embassy in Nairobi, Kenya, a new, modern, and powerful photovoltaic system has been installed on the island by Energy Solutions Seychelles, ensuring a reliable power supply.

Solar backup power supply for home Seychelles

Water heating accounts for an average of 18% of the total energy used in the household, or around 162 kWh per month. On a normal day, a water heater runs for around 2 to 3 hours a day, which means that it will consume roughly 4-5 kWh of electricity a day. Heat pump water heaters are more efficient and can run on around 2.5 kWh per day. But power outages ...

Integrating a battery backup into an existing solar system offers enhanced energy independence and resiliency, ensuring power availability during outages while maximizing renewable energy use. To gain more control over your energy needs and secure uninterrupted power supply, consider the value of adding a battery backup to your solar installation.

*Updated the 4 of August 2023 Having a backup power supply for your home provides peace of mind and is why many are now turning to home battery backups as the perfect complement to a new or existing solar system. They are designed to charge from your rooftop solar array or from the grid and can be automatically activated should you lose power.
