

How secure is Malta's energy supply?

The security of Malta's energy supply is a key area of focus for us. Being a small island, Malta has a small electricity supply system and only a single electricity supplier (Enemalta plc) and depends heavily on imported energy sources. Malta also has no natural gas pipeline interconnection with neighbouring countries.

Can I apply for a property grant in Malta?

The applicant is not entitled to receive a grant if the property is used principally for business purposes, including the letting of the property on a commercial basis (even if the tenants' use of the property will be residential); technology from any other schemes that include national or public funds such as Government of Malta funds.

Can Malta import hydrogen from Italy?

Malta is also actively studying the possibility of importing hydrogen from Italy through the Melita TransGas Pipeline project, which will not only end Malta's isolation from the trans-European gas network but will also provide an opportunity to import renewable gases, such as green hydrogen or biomethane, once the market develops.

Solar panels in Malta can reduce energy bills, help to reduce carbon emissions, and even make money through the government's Feed-in Tariff program. Solar panels in Malta are becoming more cost-effective and efficient, making them an attractive option for homeowners and businesses. One company offering solar panels, is Virtue Solaris.

Energ&#237;a Limpia: La energ&#237;a solar es una fuente de energ&#237;a limpia y renovable que no produce emisiones de gases de efecto invernadero ni contaminantes atmosf&#233;ricos. Ahorro de Costos: Al aprovechar la energ&#237;a solar, los hogares y las empresas pueden reducir sus costos de electricidad a largo plazo, ya que la energ&#237;a solar es gratuita y abundante en Malta.

Due to its geographic location and climate, Malta has awesome potential for using abundant solar energy to power up our homes. We have an average of more than 3000 hours of sunshine per year, strong solar irradiance figures and the location right in the middle of the Mediterranean Sea, making us an ideal place to harness the power of the sun.

On the 31 st January 2024, the Ministry for the Environment, Energy and the Regeneration of the Grand Harbour, launched a Preliminary Market Consultation (&quot;PMC&quot;) to assess market appetite for the development of floating solar technology projects, including photovoltaic farms within the territorial sea of the Maltese Islands. 1 This forms part of the Maltese Government's strategy to ...

Photovoltaic (PV) system: A complete set of components for converting solar radiation into electricity by the

photovoltaic process, including the array/s of photovoltaic modules that collect and absorb sunlight for conversion ...

"Altern Limited offered the Local Government Association an excellent service in the collection and finalization of the Energy Audits of all the 68 local councils in Malta and Gozo which were an essential part of the SunEagle project, financed through the LIFE+ Programme."
