What is GTB series micro inverter?

GTB series micro inverter has high efficiency MPPT engine, intelligent wifi module, multiple security protection, simple installation, reliable performance, equipped with a new generation of smart home (smart life app) wifi monitoring system to use together, to achieve the Internet of things intelligent online monitoring and control!

Are GTB micro inverters safe?

The GTB micro inverters are designed with safety requirements according to international standards (IEC 62109-1 /-2, EN61000-3-2, EN61000-3-3, EN50438, VDE4105, VDE 0126, UL1741, AS4777.1/.2, etc.). However, certain safety precautions must be taken during the installation and operation of this equipment.

How to install a micro inverter on a PV holder?

Step 1 Installation for fixed the inverter on the PV holder with the screws attached is as following: Step 2 Connect the two DC terminal of the PV to the inverter, positive to positive, negative to negative. Show below: Step 3 Open the waterproof cap on AC output side of the micro inverter, then plug to AC power line. Show below:

What is a micro inverter?

2. Micro inverter is a grid-connected power generation equipment, it must be connected to the grid and the grid can work properly to generate electricity, when the grid power outage, the device will also stop generating electricity. 3.

Where should micro-inverters be installed?

2. Check the surrounding installation environment, micro-inverters should be installed in places with good air flow and avoid direct coverage of rain and snow, such as: the solar panel below, under the eaves or indoors, etc., around the air flow conducive to micro-inverter own heat dissipation.

Model GTB-300 TB-350 TB-400 Import(DC) Recommended solar panel input power (W) 200-300W 250-350W 275-400W Number of DC input connections (groups) MC4*1 ...

The GTB 2000W micro inverter offers up to 95% conversion efficiency, ensuring efficient energy usage. High-performance MPPT technology optimizes solar panel performance and reduces energy costs. Self-cooling design and IP66 waterproof housing ensure durability and reliability. Monitor your energy system in real time via Wi-Fi or mobile app and manage it effortlessly.

A solar micro inverter or micro inverter is used in photovoltaics, converting direct current (DC) generated by a single solar module to alternating current (AC). 2800W grid-tie inverter ...

Wide voltage input, inverter direct solar panel, with precise MPPT and APL functions, automatically adjusting the power of the solar panel to the maximum output, thereby achieving ...
